

CSE112_Bonus (10 Marks)

Early Submission (Week 13) (2 Marks)

AI Tools & Technologies (2 Marks)

- Use ML-based traffic prediction (scikit-learn or TensorFlow) trained on the provided temporal traffic data to forecast congestion

Enhanced Visualization & UI (2 Marks)

- Side-by-side algorithm comparison visualizer (e.g., Dijkstra vs A* race animation)

Deployment & Engineering (3 Marks)

- Deploy the demo as a live web app (GitHub Pages, Vercel, or Render) with a shareable link
- Containerize the project using Docker so it runs identically on any machine

GitHub Repo with a good Readme file + Good Demo and LinkedIn Post **(1 Mark)**
